Refining the curriculum of Regulation 2018 based on stakeholder feedback aims to advance research and development, foster innovative technology applications, and promote entrepreneurship. Faculty feedback highlights the courses' strong alignment with program outcomes and the effective use of online tools to enhance participatory learning and practical exposure. Alumni emphasize the need for curriculum revisions to equip students with industry-ready skills. They advocate for the development of professional competence and soft skills through case studies, practical applications, and projects. Additionally, they recommend enriching the curriculum with courses focused on employability and current technological advancements to support lifelong learning. Alumni also suggest incorporating various assessment tools. Employers appreciate the inclusion of industry-designed elective courses and recommend making internships mandatory.

Action to be taken:

- Introduce new courses or modules focused on nurturing research and development, fostering innovative technology applications, and promoting entrepreneurship.
- Develop courses specifically aimed at improving students' employability skills, such as communication, problem-solving, and teamwork.
- Introduce courses focusing on current technological advancements and trends to promote lifelong learning among students.
