### **SPEAKER FOR TECHNXT - WEBINAR#1**

**Mr. ABID AHMED SALEM, SENIOR SOLUTION ARCHITECT, ERICSSON GLOBAL INDIA, BENGALURU**

The Session progressed with the expert talk by Mr. Abid Ahmed Salem. He gave a detailed outlook on the topic “Edge Computing”.

Some of the Key points from the webinar are:

Edge computing is a distributed computing framework that brings enterprise applications closer to data sources such as IoT devices or local edge servers. This proximity to data at its source can deliver strong business benefits: faster insights, improved response times and better bandwidth availability.

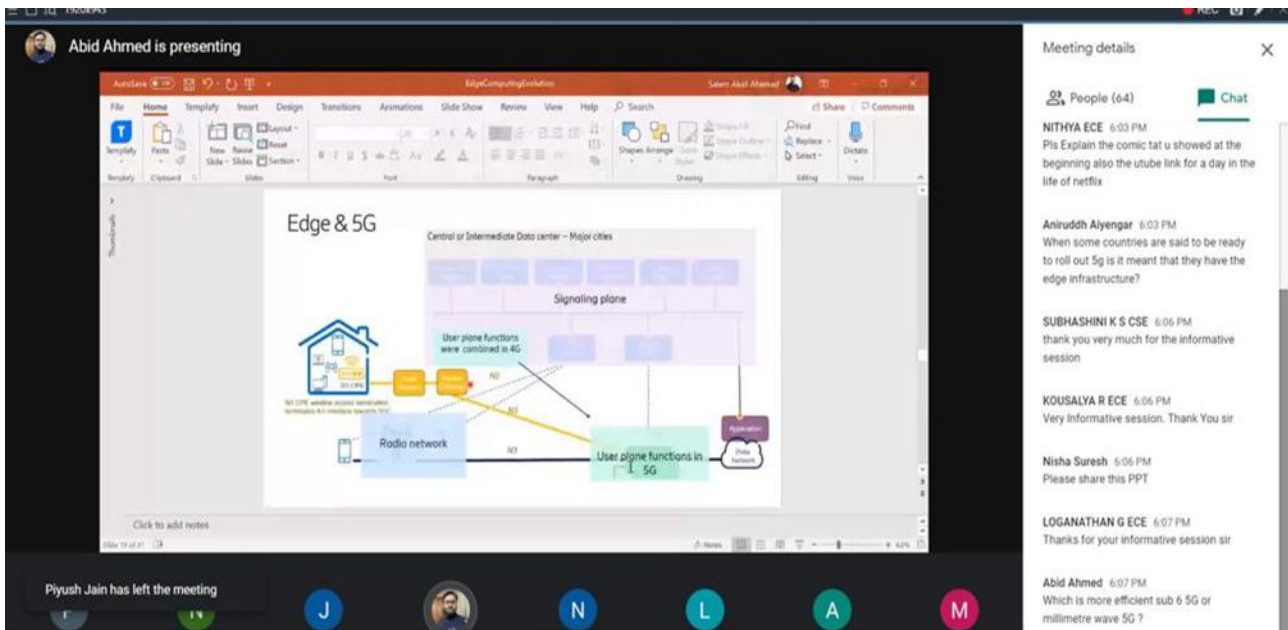

Edge computing and mobile edge computing on 5G networks enables faster and more comprehensive data analysis, creating the opportunity for deeper insights, faster response times and improved customer experiences.

Edge computing with 5G creates tremendous opportunities in every industry.

It brings computation and data storage closer to where data is generated, enabling better data control, reduced costs, faster insights and actions and continuous operations. How CDN is used to increase the speed of 5G network was also conversed.

A detailed insight was thrown on comparison of IaaS, PaaS, SaaS

The future of mobile cloud computing, integrating cloudlets and mobile Edge Computing were discussed.

The session was very informative and enlightening. All the participants were captured by the knowledge portrayed by the chief guest speaker. The chief guest speaker was also keen on the “Q&A” session and answered the active queries put forth by the participants.
