Brief Report including above information (Max. 200 words for Centers/ Sub-Centres & 75 words for IETE SFs Two photo graphs)	One week international short term training program (STTP) on “ Emerging trends and Research challenges ” was conducted by the department of electronics and communication engineering, from 21st February 2022 to 26th February 2022 . Six eminent speakers from various institutions across the globe were invited to give special talks on various emanating topics each day. On the First day of the program, Dr. S. Muthukumar, Head of the Department, Electronics and Communication Engineering addressed the

participants and gave the welcome address. The speaker for the first day event was **Mr. Shanthababu Pandian**, AI & ML Architect, Cognizant Technology Solutions, London. Dr. R Gayathri, Associate professor/ECE, SVCE introduced the speaker. The speaker gave a special talk on the topic '**Influence of AI –ML and its inevitable role in the current digital world**'. The speaker started the talk by explaining the basics of AI, ML etc. and introduced the participants, through many videos and animations, to various possible applications where AI and ML can be used.

The second day of the event was graced by **Dr. Hemalatha**, Professor, University of Technology and Applied science. Ms. R. Rajeswari, AP/ECE, SVCE, introduced the speaker to the participants. The speaker gave deep insights on the topic '**Transfer learning techniques and its applications**'. Speaker also conducted hands on session in which participants were introduced to how transfer learning coding is done with the help of python.

Training program on the third day was on the topic, '**Deep learning research methodologies and applications**'. **Dr. R Gayathri**, Associate professor/ECE, SVCE, was the speaker. Dr. K. Ashwini, AP/ECE, introduced the speaker. Speaker gave participants a profound understanding on many research challenges in the field of deep learning.

Talk on fourth day of the STTP was again given by **Mr. Shanthababu Pandian**, AI & ML Architect, Cognizant Technology Solutions, London. '**A practical approach towards deep learning**' was the topic of discussion. The speaker conducted an extensive hands on session describing various applications of deep learning approach.

Dr. Meenalosini Vimal Cruz, Assistant Professor, Georgia Southern University, was the resource person for the fifth day event. Ms. S. M. Mehzabeen, AP/ECE, SVCE, introduced the speaker. The speaker gave the talk on the topic '**Brain-Computer Interface: Challenges and Research Perspectives**'. Various real time applications related to the topic was discussed followed by a hands on session.

The final day of the event was on the topic '**Practical aspects of Text to Speech synthesis**'. **Dr. G. Anushiya Rachel**, Associate professor, **Karynya institute of technology and science** was the resource person. Mr. S.P. Sivagnana Subramanian, AP/ECE, SVCE introduced the speaker. The speaker gave the presentation for about one and half hour on the topics namely speech synthesis, text synthesis and speech to text conversion.

Each day of the event ended with a question and answer session that was held for about fifteen minutes. All the queries raised by the participants were clearly addressed by the speakers.

Vote of thanks was delivered by Mr. S.P. Sivagnana Subramanian, AP/ECE, SVCE on the final day of the event and all the participants were given the participation certificates. Hema Latha is presenting

When does transfer learning not work?

- Transfer learning will not work when the high-level features learned by the bottom layers are not sufficient to differentiate the classes in your problem.
- When datasets are not similar, features transfer poorly.
- When removing some layers from the model. Transfer learning will unlikely to work in such situation. This is because removing layers reduces the number of trainable parameters, which can result in overfitting.
